

VINAY KUMBHAR

SR. ANDROID DEVELOPER

Email: vinaykumbhar.jobs@gmail.com | Phone: +91 7875698608 | Location: Pune, Maharashtra

Senior Android Developer with 11+ years of experience designing and delivering scalable native Android applications using Kotlin, Java, MVVM, Clean Architecture, and Jetpack. Experienced in offline-first architecture, production support, performance optimization, REST API integration, and enterprise mobile banking applications.

SKILLS

Languages:	Kotlin, Java, XML, JSON
Mobile Dev:	Android SDK, Jetpack Compose, Kotlin Multiplatform
Architectures:	MVVM, MVI, Clean Architecture
Concurrency & DI:	Coroutines, Flow, Hilt, Dagger
Jetpack & Libs:	ViewModel, LiveData, Room, Navigation, Data Binding
Networking:	Retrofit, Volley, OkHttp, REST APIs
Tools & Testing:	Android Studio, Git, GitHub, JIRA, Postman, JUnit, Mockito

EXPERIENCE

Globant India Ltd. - Senior Android Developer Aug 2024 - July 2026 | Pune, India

- Designed and built a reusable Deep Link Navigation framework for HSBC mobile banking applications across multiple country-specific variants.
- Developed secure mobile banking features following strict enterprise coding and security standards.
- Optimized application performance and refactored navigation flows to improve user experience.
- Led regular peer code reviews and release activities to ensure code quality across the mobile team.

Tata Consultancy Services - IT Analyst Jul 2021 - Aug 2024 | Pune, India

- Analyzed and resolved complex, high-priority production issues, delivering long-term technical fixes for enterprise banking applications.
- Implemented Firebase Analytics events and custom conversion funnels to track user engagement and analyze application usage.
- Provided technical insights based on analytics data to help product teams implement data-driven improvements.
- Collaborated with cross-functional Agile teams to resolve technical blockers and ensure timely sprint delivery.

Ramanbyte Pvt. Ltd. - Android Developer Apr 2018 - Jul 2021 | Pune, India

- Developed and maintained native Android applications using MVVM architecture to ensure a scalable codebase.
- Improved application stability and performance through targeted debugging and code optimization.
- Designed local database schemas and integrated REST APIs using Retrofit for reliable data handling.
- Wrote unit tests using JUnit and Mockito to catch defects early and resolve production issues.

RSL Solutions Pvt. Ltd. - Android Development Engineer Mar 2015 - Apr 2018 | Pune, India

- Designed and developed Android applications from initial concept up to successful Play Store deployment.
- Optimized overall application performance by refactoring inefficient and legacy code modules.
- Gathered business requirements from clients and translated them into technical solutions.
- Delivered reliable software releases by following structured SDLC practices and agile workflows.

PROJECTS

RedSea

A travel and hospitality application enabling users to discover premium resorts, book transportation, and explore wellness, cultural, and adventure experiences. Contributed by implementing analytics tracking, conducting peer code reviews, resolving defects via unit testing, and collaborating with cross-functional teams to ensure robust feature delivery.

HSBC Mobile Banking App

Developed secure features for a multi-country banking application. Enhanced core navigation frameworks and overall screen rendering performance utilizing MVVM and Clean Architecture patterns.

MyBpost

A parcel and mail management application enabling users to track shipments, manage deliveries, and create shipping labels. Served as the Android representative in the Operations team, analyzing production incidents using AWS CloudWatch and API logs, implementing Firebase Analytics, and deploying critical hotfixes.

Classroom+

An Android-based classroom management system streamlining academic modules. Spearheaded development of the Quiz module by implementing an offline-first architecture utilizing Room/SQLite for local persistence and WorkManager for stable background data synchronization.

easyFood POS

A merchant point-of-sale application for order management, bill printing, and sales reporting. Implemented new feature sets, integrated core REST APIs, fixed critical defects, and optimized local performance workflows.

AWARDS & LANGUAGES

- **Spot Award (Tata Consultancy Services):** Recognized for outstanding performance, ownership, and timely delivery while supporting critical production applications.
- **Client Appreciation (HSBC):** Received rank 3 "WE DID IT" and a Pat on the Back for high-quality solutions, proactive issue resolution, and core mobile navigation enhancements.
- **Languages:** English, Hindi, Marathi

EDUCATION

Master of Computer Applications (MCA) | T. C. College (Savitribai Phule Pune University) | Aug 2011 - May 2014

Bachelor of Science (B.Sc.) in Computer Science | Miraj Mahavidyalaya (Shivaji University Kolhapur) | Jul 2008 - May 2011
